**NOTICE OF PROPOSED NO FURTHER ACTION
REGARDING AN OCTOBER 2006 GASOLINE SPILL AT**

REDWOOD VALLEY STATION
8551 EAST ROAD
REDWOOD VALLEY, CALIFORNIA

CASE NO. 1NMC578

Posting Date: August 27, 2008

Comment period ends 30 days after the date of posting

Problem Description: In October 2006, gasoline was spilled from a tanker truck filling underground storage tanks at the Redwood Valley Station in Redwood Valley. Gasoline flowed over the pavement and impacted surface soil on the north side of the site.

Actions Completed: In the three days following the spill, impacted asphalt and soil was removed and later transported to a proper disposal facility. A subsurface investigation in December 2006 revealed residual gasoline contamination in groundwater in the immediate area of the gasoline impact to soil. Monitoring wells were installed in May 2007 to evaluate the need for remediation. In one year of quarterly groundwater monitoring, no gasoline was detected in groundwater samples from the monitoring wells.

Proposed Action: No further action related to the October 2006 gasoline spill is proposed, once the groundwater monitoring wells are properly destroyed. This site will remain an active cleanup site for other historic releases from the underground storage tanks, unrelated to the October 2006 spill.

Unless comments are received with significant new information, Regional Water Board staff plans to proceed with the no-further-action determination upon conclusion of the comment period. Please contact Craig Hunt at (707) 570-3767 or in writing with any questions or comments.
